DAIRY PRODUCTION AWARDS

Our dairy program strives to recognize exhibitors' animals not just on show day, but on what is happening in the barn every other day of the year through an award that directly recognizes an animal's milk production. To align with industry standards, animals' production will be evaluated based on total pounds of Energy Corrected Milk (ECM) produced.

Dairy Production Award Information & Eligibility:

- 5. ECM will be calculated from the animal's production data. Production data can be provided from any accredited dairy program that the exhibitor utilizes (D.H.I.A., PCDART, DairyComp, etc.) The following formula will be used for calculation:
 - ECM = (0.327 X milk lbs.) + (12.95 X fat lbs.) + (7.2 X protein lbs.)
- 6. Animals must be at least two years old and milking 40 days to be considered for a Dairy Production Award. For animals three years and older, ECM will be based on last completed lactation. For two-year-olds who have not completed a lactation, ECM will be based on projected 305ME or best available information. 7. Exhibitors must have owned the animal for the entire lactation period.

To enter your animal for award consideration, please submit the Dairy Production Award application and production data your animal(s) to the Fairboard office by 1:00 p.m. on the Monday of Fair. Exhibitors may enter as many of their lactating animals being exhibited as they choose. Electronic applications are available at fair.sanilacfair.org. Paper applications are available at the Fairboard office. Advance registration is not required to participate, all exhibitors who submit the required application and production data by the deadline will be considered.

Registration	Thursday, August 7th 2:30 p.m.	Livestock Arena
Judging	Thursday, August 7th 3 p.m.	Livestock Arena

Learning Objective: Livestock judging is a process of evaluating, selecting, and placing various livestock species by comparing the merits of one animal against the merits of other potential project animals. In 4-H, livestock judging contests are held to help youth acquire a better knowledge of livestock and to develop skills in selecting quality animals.

PROJECT REQUIREMENTS

- 1. The contest will consist of one class each of beef cattle, sheep, swine, and a livestock management skills test of 25 questions. Each class will be composed of four animals selected and provided by the livestock judging superintendent and corresponding species superintendents. The livestock management skills test may include identifying common tools, breeds of livestock, feedstuffs, or other items used in the livestock industry.
- 2 Scores will be based on a possible of 50 points for each placing class 6. and 50 points for the management class. With four classes to be placed and one set of questions, there would be a possible score of 200 points per contestant. In case of a tie, the highest award shall go the individual scoring highest in the management class; if a tie still exists, the individual with the most perfect scores per class shall be listed first.
- 3. Contestants will be divided into five equal-sized groups prior to the start of the contest and must remain with the assigned group throughout the contest. Contestants will be given 8 minutes to place each class. Each group will be supervised by an adult leader, who shall collect his/her group's placing cards when time is called on each class. A packet of these cards will be distributed to each

contestant during contest registration.

- 4. Market cattle and swine will not be handled. If the market lambs are handled, contestants will stand in line and will be allowed time to handle each lamb individually.
- 5. The official placings and cuts will be presented by the contest officials at the conclusion of the contest. Answers to the management portion of the contest will also be given at this time.
 - The results of the contest will be announced on Saturday preceding the announcement of the sweepstakes showmanship winner.
